  - NextUI, Framer motion, Shadcn, Material UI
  - CSS ,SASS, TailwindCSS

WORK EXPERIENCE

FRONTEND DEVELOPER   *08/2023 - Present*

Vua Thợ – Ho Chi Minh City, Vietnam

The Company's industry: Service Marketplace.

Vua Thợ connects customers with skilled Service Provider, ensuring a perfect match. Customers access high-quality services, while Service Provider expand their client base and showcase their expertise. This connection fosters a mutually beneficial relationship, enhancing satisfaction for both parties.

PROJECT:
PROJECT #1: Solo Website Vua Thợ (vuatho.com/vi)
PROJECT #2: Solo Webview test service with AI for App application (IOS and Android)
PROJECT #3: Solo Webview ChatBox for VuaTho App (IOS and Android)
PROJECT #4: Solo Webview chat 1 vs 1 (realtime, IOS and Android)
PROJECT #5: Solo Website Lottery Vua Thợ
PROJECT #6: Solo Website Promotion Vua Thợ
PROJECT #7: Solo Website for startup product PartPork

My responsibilities in 7 projects include:

- Communicate closely with design, backend, and project leadership teams to maintain consistency and high performance throughout development.
- Realtime, Stream Api,...
- I can make animation smooth with Framer motion.I have experience working on frontend development and backend integration, particularly in communication and API integration across 7+ projects.
- Quickly assimilating and applying new frameworks to streamline product development.
- Promptly addressing technical issues arising from requirements to ensure project timelines are met without compromise.
- Developing and deploying webviews for applications to reduce wait times for Appstore approval and facilitate rapid adjustments.
- Possessing solid knowledge of backend development to effectively support and collaborate with backend teams.

PERSONAL PROJECTS

English Blog And CMS (NERN Stack) #4   *02/2024 - 04/2024*

Technologies used: Cloudflare, NextJS14, NodeJS, ExpressJS, MongoDB, TailwindCSS, NextUI, Framermotion.

- Backend (basic):
- NodeJS
- Socket
- ExpressJS, MongoDB, SQL
- Prisma

Activity and Awards

2023
Top 3 Web Designs for the AI Hackathon Project

Habits

Badminton, walk ,reading book.

- I built a website solo from scratch.
- The CMS stores the article content in its database and references the image location in Cloudflare R2.
- I had the opportunity to learn how to purchase a domain and deploy a website from scratch.
- User can read article from the trisielts.online

Demo: https://www.trisielts.online (updating)
And CMS: But i can't demo this in there.

This website is a gift i make for my borther.

Shop 3D Threejs #3   *01/2024 - 01/2024*

Technologies used: Threejs ,Nextjs, Framermotion, NextUI, TailwindCSS

- You can expand it into a high-quality demo 3D clothing store.
- Getting acquainted with 3D website design and animation.
- Opportunities to incorporate additional libraries

Functions: Upload 3D images onto a shirt or a shirt logo.

Demo: https://trello-web-yv1v.vercel.app

Trello clone (NERN Stack) #2   *11/2023 - 01/2024*

Technologies used: NextJS14, NodeJS, ExpressJS, MongoDB, TailwindCSS, NextUI, Framermotion.

- Utilized advanced libraries like DNDKit for drag-and-drop functionality.
- I redesigned the interface of Trello.
- Develop an API for data storage and showcasing.
- Enhanced data transformation capabilities across both frontend and backend.

Functions: Login, Create Deleted Update Board, Liked Board, Rencent Board.

Demo: https://trello-web-yv1v.vercel.app
